

How does CCDH Esoteric Acupuncture work as opposed to the other kinds of acupuncture i.e. electro acupuncture and laser acupuncture?

In CCDH you are taught to use a crystal or even a glass of water, your physical body or a stone or even a cushion or pillow to direct specific frequency using the most powerful tool you innately possess – your mind/brain to locate and/or send specific frequencies to achieve a pre-determined or given objective using your innate mind to deliver results that will astound you. Specific frequencies are delivered specific parts of the physical body and also the many so far undefined energy systems that make the spiritual life and the physical life one and the same thing. In CCDH as the system has been used over the last eighteen years it has been discovered that the Higher Self has an intimate knowledge of these so far misunderstood and undefined energetic systems and how they actually relate and correlate to the physical health of the individual be it animal or human being. When you do the CCDH exercise to GET INTO THE VAULT you actually bring in your Higher Self (the part of you that knows who you are, why you are here and the best path forwards for you) The soul is resident within the physical body and has a much higher evolutionary knowledge than the physical brain can comprehend, if you would like more information on this read Convoluted Universe books one two and three by Dolores Cannon – you see there is much more to you than meets the eye and you can do this very easily as taught in CCDH by the very detailed A – B –C method, introduced by Jeanne Ames and her ~Angels and Masters in Absolute Truth and indeed tried and tested by Jeanne Ames both on herself and her journey (Jeanne has actually “died” twice and was given a grim prognosis and told there was only maintaining optimum levels of life no recovery and she was told by the nurses looking after her that she would not be able to walk more than six yards, lie flat and had to modify her life to cope with the condition of viral inflated cardiomyopathy (an enlarged heart that produced a double heartbeat and mitral valve failure in other words complete heart failure). When you begin applying CCDH Esoteric Acupuncture you are taught to direct specific energy to specific acupuncture meridian pathways and this is no different in its efficiency to the forms of electro acupuncture and laser acupuncture we will explore later. However CCDH Esoteric Acupuncture is very much more efficient, accurate and - as has been learned tried and tested by Jeanne in many new applications formats – a person having learned CCDH is able to direct specific frequency to specific systems and acupuncture meridian pathways that have lain undiscovered since time began (because how can you discover an acupuncture meridian pathway that exists in energy form only if you are not using energy to locate it in the first place. Using a sending and balancing techniques taught in CCDH Jeanne has been able to uncover and test the application of specific frequency to these undiscovered energy systems and the work is now coming to full fruition as the pieces of the jigsaw begin to slot into place.

Once you have learned CCDH Esoteric Acupuncture you have it for life and when you become accustomed to using it you need no tools just your mind and the knowledge of application and your finger and thumb!!

You can buy books on acupuncture treatments for animals or people and without using needles use the locations already discovered in the text book and apply the specific frequency of balancing energy to the specific acupuncture meridian pathways in the book.
