

## Testimonial Janet Peers

I went to see a reflexologist because I was so unwell. She suggested chiropractor who then suggested dietician who sent me to Jeannie. I had been diagnosed with Raynauds, Bronchiectosis, Oesophagal reflux, Primary Bilary Cirrhosis, Osteopoerosis. With the exception of PBC none of the diseases are life threatening, but extremely debilitating. I felt so overwhelmed by my diagnosed diseases and situation that I had decided to sell my bungalow and move into an old peoples complex. All of this took place in 2005.

I went to see Jeannie with a totally open mind not knowing what to expect but had hopes of some sort of change which would give me a quality of life. The change that my visits to Jeannie have brought about achieved that transition. The first change I noticed was increased energy. Jeannie gave me exercises to go away to work with and what Jeannie taught me to do with my mind gave me the ability to take control of my life situation and my health. Slowly I became a healthier happier and a more positively focussed person.

When I needed help and reassurance I could ask the Angels to help and guide me as Jeannie had taught me. This knowledge has given me tremendous security and confidence. When I went to Jeannie I had no prior knowledge or understanding of Angels. I began in a small way to test the theory and my first experience was when I lost a key. I asked the Angels silently in my head whether they could help me find it and within minutes the key was in my hand. From there I expanded my experimentation with this unseen help and my next experience was my 70<sup>th</sup> birthday party, which I held in the garden of the bungalow I had been preparing to sell. I asked for help with organising what was a rather large party and everything worked beautifully. Sometimes when I am going shopping I ask for help finding a parking space and the Angels always are there for me.

This last twelve months have been the most extraordinary of my life. I have met and married a wonderful man. Everything to do with the wedding and being together has fallen into place using CCDH philosophies on working with my mind Angels and NLP. On a recent visit in October to my specialist for the PBC I had a scan and there is no sign of PBC. The specialist is mystified.

The icing on the cake is for years I longed for a grand child and this year my daughter Sue will be five months pregnant at Xmas and will be spending that Xmas with me my husband and her sister.

It is fair to say since I went to see Jeanne in 2005 with my medical prognosis my life has changed for the better beyond my wildest dreams. I have a completely different philosophy on life and I enjoy every moment. I see Jeannie every six weeks for “tune ups” and we are at present also working on my sleep patterns.
